## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1 and 4-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: It is agreed that the prior art of record fail to teach or suggest alone or in combination, the limitations: "or suggest that the feeding terminal electrode and the other electrode of the filter are electrically connected by at least one connecting wiring provided on one or more dielectric sheets, and two or more via-contacts each of which is composed of a conductor embedded into a contact hole formed in at least one of the one or more dielectric sheets, wherein the at least one connecting wiring and the two or more via-contacts are not exposed to an outer face of the laminated dielectric block, and wherein the two via-contacts are formed at places that are different from each other on a plane view of the dielectric block" in a manner claimed in claims 1 and 11. It is for these reasons in combination with all the other limitations in the independent claims 1 and 11, that claims 1, 4-10 and 11-13 are allowable over prior art of record.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
